Simply Personnel 12.8 Update

Please find enclosed the following enhancements provided in Simply Personnel 12.8 update.

- Improved security with changes to database connections

- Mail merge now using 'Open Office' API – no need for a separate Microsoft license

- Negative holiday entitlements will now be allowed as a valid entry

- Length of allowed data has been extended within self-service for address's and salary details

- Improved security with removal of ability to write SQL code directly into Simply Answers. Bespoke scripts are still available to run as normal under the 'Load Query from DB' section.

- Timesheet views have been extended so data is better presented when working in monthly view

- MS Word 2013 is now compatible when mail merging documents

- Maternity/Paternity/SPL calculator print preview option - error fixed

- A custom manager user will now appear as an option on an employee's time and attendance approver list

- New warning message added – notify if training courses are almost full

- Self-service salary fields now decimal to reflect Personnel Manager database

- New employee's holiday entitlement defaults correctly if hours is selected

- Save button removed from salary if the user has been given read only rights
